• Built, compiled and configured an LFS (Linux From Scratch) distribution for a router.

CRIO.DO Teaching Assistant

Jan 2020 - Present Remote

- Assist students during Crio Workshops and Tryouts.
- Bug test and give opinion on new features for workshops and modules.

PROJECTS

TENGI Shell

ANCI C

A minimal shell written in C. The goal with the project was to learn how a UNIX shell works and communicates with process and system calls. The project is written to be cross-platform and has no dependencies except needing a C Compiler.

LYCEUM Static Site Generator

ANCI C

Static Site Generator for my website that uses only plain text files.

VOXEL Game Engine

C++, OpenGL

A Game Engine written in C++ with Voxels as it's smallest unit instead of pixels.

LIBRELOG Book Cataloguing System

Python, Django

Built as part of a college project to learn Django.
